

Press Release on

Programme for Senior Manager's Course (Module 2)

Expanding the "Horizontal Perspective" through Flow Concept

VLFM Senior Manager Programme started Module 2 on "Horizontal Exploration" from **8th - 12th Sept in CII Gurgaon**. This Module focuses on understanding the concept of manufacturing as a flow through the entire supply chain to the final consumer. The VLFM Programme emphasizes skill building rather than depending on conceptual training alone and focuses on mindset change rather than providing a tool kit only.

Mr Takeyuki FURUHASHI, Japanes Expert on Toyota Production System guided participants on Principle and Benefits of Flow Concept. During the Module 58 Participants of senior Management from 28 Companies attended 2 Plant Visits in Sandhar Automotive, Gurgaon & Gabriel Khandsa to apply the Learning of Module through VMap 1 & 2. These tools helps Leaders to Visualize the Three Main Flow of Manufacturing i.e Delivery Flow, Production Flow and Procurement Flow between Suppliers and Customers.

During the Module, Mr Hussain Shariyarr, Manufacturing Head & Senior Vice President, Godrej & Boyce Mfg. Co. Ltd. Shared "Godrej Shirwal Case Study on Transforming an Organization". Mr Hussain, who is also a graduate of Batch 2 of the VLFM Programme has keenly learnt and applied the learnings of the VLFM Programme to achieve the results shared in the case study. He applied the 7 Infrastructure Tools for New Activity, Five Step Discovery Process and the BIG M Concept to transform the Godrej Shirwal plant.

Mr Hussain Shariyarr, Manufacturing Head & Senior Vice President, Godrej & Boyce Mfg. Co. Ltd. Sharing “Godrej Shirwal Case Study on Transforming an Organization” during Module 2 of VLFM Senior Manager Programme on 12th Sept 2015 in CII Gurgaon.

Mr Neeraj Hans, Chief Operating Officer Sandhar Automotive, Gurgaon Shared Success Story on “Creating Complete Efficient Flow in Tier 1” to all the Participants. Sandhar has completed its participation in Type-2 Journey of 1000 VSME by implementing the Learning to the other Model Line in the Plant.
